Our goals

- Simplify search of learning resources through a common gateway holding metadata/descriptions of learning resources from a multitude of sources. The platform offer a comprehensive overview of all learning resources across publishers/suppliers and educational areas.
 - Build upon common standards to increase visibility of, and ensure updated information about, learning materials. Therefore metadata must be displayed in accordance with common standards and through existing webservice.
 - Support knowledge sharing and knowledge transfer among teachers.
 - **Provide portals and repositories of learning resources**
 - **Feed “distribution platforms”, VLEs and LMS’**
-

Content producers
Register, upload, update, search, statistics on usage
Government
Copies of tests and exams

External collections
automated metadata transfer

Distribution platforms
distribute, 'push', manage, add value

Educators
Register, upload, update, search, download, (buy at other sites)

Quality assurance is necessary

- **Technical**
 - Link check
 - Notification to producers to ensure regular updates of metadata
 - International technical standards
 - **Agreement between STIL and the content provider with:**
 - Demands regarding type and purpose of content
 - Intellectual and copyright issues
 - Demands on correctness and up to date information
 - **Ongoing manual inspection (based on samples)**
 - **2013 - 2017: Eligible for purchase support from the state**
-
